## **DETAILED ACTION**

### ***Response to Amendment***

1. The amendment filed July 13, 2007 has been received and considered for examination. New claims 25-32 have been added and therefore, claims 1-12 and 25-32 are pending.

### ***Election/Restrictions***

2. Applicant's election with traverse of cinnamaldehyde for species group A, ethanolamine for species group B and step i) for species group C in the reply filed on July 13, 2007 is acknowledged. The traversal is on the ground(s) that the Examiner has not explained why there would be a serious burden on the examiner if restriction is not required. This is not found persuasive because, as clearly evident from the claims, it would be a serious burden on the Examiner to conduct a search for each and every one of the species identified in species groups A, B and C. Examiners are not afforded unlimited time to search the various species of a claim and when the number of species is extremely large it becomes a burden for the Examiner.

The requirement is still deemed proper and is therefore made FINAL.

3. This application contains claims directed to the following patentably distinct species: The applicant must elect a single species from the following group:

Art Unit: 1797

Species Group D (activators)

cuprous iodide

cuprous chloride

an antimony compound

an antimony oxide

an antimony halide

antimony tartrate

antimony citrate

an alkali metal salt of antimony tartrate

an alkali metal salt of antimony citrate

an alkali metal salt of pyroantimonate

an antimony adduct of ethylene glycol

a bismuth compound, a bismuth oxide

a bismuth halide

bismuth tartrate

bismuth citrate

an alkali metal salt of bismuth tartrate

an alkali metal salt of bismuth citrate

iodine

an iodide compound

formic acid

combination of more than one activator selected from the above

group (applicant is required to specify which activators)

The species are independent or distinct because they are directed to various different activators having different chemical formulas. It would be a serious burden on the Examiner to conduct a search for each and every claimed specie in group D.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 26 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.  
MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
